

## Aimsio continues growth year with the addition of several new clients

Tech company signs five new clients and adds five more employees to the team.

**CALGARY (July 12, 2018)** - Many Canadian technology companies have been experiencing a rewarding year and Aimsio is no exception. The company recently added five new clients to their client list and hired five new employees. With plans to hire even more employees in the latter half of 2018, the company is excited to contribute to both the Calgary and Vancouver economies while growing their presence internationally.

Aimsio's software is known for its flexibility and ease of use, both of which helped the company secure clients in new industries. To date, Aimsio now has clients in transportation, pipeline construction, commercial construction, water management, road construction, well servicing, inspection, equipment maintenance, and electrical and instrumentation. The five clients that have been recently added to the Aimsio client list are below:

[SITE Resource Group Inc](#) from Sherwood Park, Alberta offers an extensive suite of construction services. SITE is utilizing Aimsio to help with efficiently capturing data in the field in order to increase productivity.

[IDEAL Completion Services](#) has signed up with Aimsio and is looking forward to streamlining their field operations in multiple locations across Canada and the U.S. IDEAL was formed in January 2017 with the acquisition of the flowback division of Cathedral Energy Services.

[Watts Projects Inc.](#) is currently implementing Aimsio. The Red Deer company also has offices in Edson, Fort St. John and Grande Prairie. Watts Projects Inc. focuses on facility construction, secondary containments, pipeline construction, and quality control.

[Stratus Electrical and Instrumentation](#) is currently finishing up training on the Aimsio software and will be live in the coming weeks. Stratus provides a full scope of electrical and instrumentation services to companies of all sizes.

[JessCo Solutions](#) is currently using Aimsio after a short implementation period of less than three weeks. JessCo Solutions is a vapor recovery solution for the oil and natural gas industry. Based out of San Angelo, Texas the company helps maximize profits by capturing and compressing vapor that would otherwise need to be vented or flared.

To accommodate the growth, Aimsio is predicting a need to hire more Developers, Business Analysts and Sales Representatives in the coming month.

### About Aimsio

Aimsio is a software that allows companies with field operations to easily manage their crew, equipment, and projects in the field. Aimsio helps field service companies painlessly transition from antiquated processes and manual paperwork to a streamlined system, where all their operational data is accessible on the cloud. Aimsio has two offices, one in Calgary, AB and one in Vancouver, BC. For more information about Aimsio visit [www.aimsio.com](http://www.aimsio.com).
